About Us

Who We Are ?

5 RAD Techies started its journey in 2017 from telemarketing and advertising business and focused the client-based business solutions also known as the Business Process Outsourcing to build strong relationship in the market. The company has not only grown vertically but also horizontally and included other domains in the business portfolio over the period with assurance of quality measures for their products and services. We have divided the roles among our teams to ensure that the customer should get a customized solution and free consultancy for their business requirements to achieve their objectives related to sales and marketing as well as BPO.

What We Do?

Fresh Ideas For Every Business

Fresh Ideas For Every Business

Our business model is dependent over service agreement between our organization and the client. We believe that every business has different requirement due to which different solution is needed for the company. 5 RAD Techies is committed to provide the consultancy to each client to bring the best solution for their respective business and implement the strategy to execute the business process either it is related to IT services or marketing of the company.

Why Choose Us ?

Save time and effort with our 5 Rad Techies

We believe that the quality of services is the expectation of every customer, and it is an art to identify the needs of the customer and design a solution accordingly. Today, the service providers are competing over the fast delivery, easy methods of execution or pricing of their services. However, 5 RAD Techies is focused on the customer driven business strategies. The difference we have been creating is that we not only prioritize the brief of the client but also start collecting the customer insights and make observations to provide the best suitable solutions to our clients which may help them to excel their business.
